

Homebound Student Attendance

If a student has a special code of HB or HS or a program code of 17 the student will appear in the list with a red background behind the student name. This indicates he is homebound and does not need attendance posted for them.

Additionally if the student has a program code of 17 you can post start and end dates. The attendance posting program will identify the student as home bound only during that time period. Otherwise the student will appear as a normal student (white background). If there is a program code 17 but no date range, the program treats the student as a Home Bound student.
