

Lesson Planner FAQ

Question: My homework is not displaying on my teacher website, but I can see it in the Lesson Planner; why isn't it appearing?

Answer: Homework is not posted publicly until the day the lesson is to be taught. By default, the post time is 2PM, however, each district may choose its own post time.

When working in your own calendar, you can click the **View Public Calendar** button (shown below) to see what parents/students currently have access to.

If you'd like to post an assignment right away, you can create a calendar event that will appear immediately. Simply open your calendar (using the *Calendar* tab), click in the correct day, and fill out the **Add Event** form.
