Write the number in standard form:
2 hundreds
6 ones
8 tens

What is the value of the underlined digit?
2,097

Round the number to the nearest 10:
678
Suggestions for Using Task Cards

There are MANY different ways that task cards can be used in your classroom to increase student engagement. Here are a few suggestions:

◆ Use in a small group.
◆ Use in a literacy center.
◆ Use as a whole group scoot activity. Place the cards around the room and have students get up and move around to find the cards and answer the questions.
◆ Use task cards with a familiar children’s game such as Candy Land, Connect Four or Tic Tac Toe. In order to take their turn in the game, they must first correctly answer the question on the task card.
◆ Use the cards to play a whole group game of jeopardy. This is especially fun with several sets of task cards. Each set can be a different category with five of six cards under it with money amounts. Students choose a category and a money amount. Flip the card over and have them answer. If they are correct, they earn the money amount for their team.
◆ Give students a task card to glue in their journal. Have them answer the question and provide evidence in a journal entry.
◆ Display a card on your board with a document camera as a warm-up. Increase the engagement by having students work in teams. Give each team a buzzer or bell!
